

Rajbir Singh

I am Rajbir Singh—a product designer with great enthusiasm for creating more inclusive and accessible digital products.

EXPERIENCE

West Monroe Partners, Seattle, WA — UX Design Intern

May 2022 - August 2022

I worked with the Product and Experience Lab team. I consulted with a large nutrition label research company along with a large energy company to deliver wireframes, low-fidelity, iterating designs, and high-fidelity mockups. Split between 4 weeks each, my contributions allowed my product team to produce twice as many screens for both projects.

JSD Creative, San Francisco, CA — UX Design Intern

September 2022 - Present

Working with product designers and industry disruptors to create digital experiences in the NFT and Crypto space that will change payment structure. I am assisting other designers in developing a wallet experience. I am creating personas, and low-fidelity and high-fidelity designs to create new experiences in trading and interacting with NFTs.

Engineers without Borders, Seattle, WA — Design Lead

December 2020 - June 2022

Managing and designing UI for rainwater systems display at UW. Our goal was to educate users about rainwater systems in the population health building. We worked cross-functionally with Dev, UXR, and designers. I delegated work amongst different team members and created quarterly milestones.

Google Case Study, Seattle, WA — UX Designer

January 2022 - March 2022

Working under the mentorship of a Google employee to redesign the consent experience. Using user research to propose a more effortless consent experience to customers using Google products.

PROJECTS

West Monroe PXL UXR Playbook, Seattle, WA — UX Design Intern

May 2022 - August 2022

I worked on various different exercises and created a best practices guide on how to make user research more inclusive and uplift silenced voices. My work has been published and is going to be distributed to 500 people across the company.
